## OVERVIEW:

Served over 30 years in the elevator and mobility industry. Unique experiences as an elevator repair technician to a project foreman and a business owner within the commercial and residential sectors has allowed for a well-rounded ability to consult on elevator projects and loss or damage of elevator systems. Served in three consulting roles, with insurance loss and damage assessment and with project consulting for a variety of vertical transportation systems. Able to manage clients, create value, and understand the complex processes involved in the elevator industry. Possesses numerous certifications and proficiencies in elevator/escalator control systems and maintenance.
